Coles College of Business

LC 4- The Business of Business

How does business perceive itself and its role in American society and abroad? How does society see business? We will explore these questions and more by analyzing cartoons, readings, and a variety of media outlets. We will also explore decision-making, privacy laws, and ethics – especially as they relate to newer technologies of business, such as social media and data analytics.

Aspiring Nurses

Are you interested in becoming a nurse? In this Learning Community, you will meet others who share similar career goals. You will receive information and advising that will help you prepare to apply to nursing school. In addition, we will explore alternative careers in healthcare and related fields, while taking the first required chemistry course together. (That makes it easier to find study buddies!)

College of Science and Mathematics

Success in Science and Mathematics

This Learning Community helps science and math majors build connections with other students and across the disciplines. Students will learn about the unique challenges facing students in degrees across the College of Science and Mathematics and how to tackle them while building a support network and beginning their studies for all of the CSM disciplines. The courses in this community will focus on integrating the many facets of success in science and math disciplines while giving students an important understanding of quantitative literacy and starting them on the path of discovery in the material universe.

GENERAL-INTEREST LEARNING COMMUNITIES – Kennesaw Campus

Emergency! Are you prepared?

An emergency occurs. Will you respond? If someone in your classroom loses consciousness, if a tornado sweeps through your neighborhood, are you prepared to help? If you become the victim of violence, do you have the skills to survive? This Learning Community will examine emergency scenarios and the responses that should follow. If you wish to strengthen your leadership skills or just want to be a prepared citizen, consider this Learning Community.

LC 22- GLBTIQ Histories and Communities

This Learning Community will explore GLBTIQ histories and identities while also connecting students to GLBTIQ resources and communities at KSU. Students will explore questions including: How did the GLBTIQ rights movement arise? How has it evolved? How have GLBTIQ movements shaped the world in which we live today? How can we empower ourselves and our peers by researching and educating others about GLBTIQ experiences? Students in this Learning Community will participate in the development of new exhibits for KSU's celebration of GLBTIQ History Month.

LC 27- Living Leadership: Becoming the Superhero You Were Meant to Be!

We see superheroes as larger-than-life individuals who accomplish remarkable things. We often have the same lofty ideas about leadership, thinking that it is something too great for us to attain. In this Learning Community, we will use contemporary superhero stories to discover how valuable we really are as individuals. We'll look at maximizing the impact we have in our everyday lives so we can solve problems, communicate, and advocate into moments that matter.

LC 28- Mathematics of Catan: A Learning Community Based on the Game Settlers of Catan

Do you like to play games? Do you like to win? Even if you do not realize it, playing a game often relies on using mathematical ideas to help reason about scenarios to make decisions that will improve your odds of winning. In this Learning Community we will play a popular board game, “The Settlers of Catan,” and consider components of game play where we make decisions that involve mathematical reasoning. By exploring various elements of the game’s design and play, we will uncover ideas about many areas of mathematics, including, but not limited to: vectors and matrices, probability, combinatorics (counting), geometry, growth patterns, and game theory. If you’ve ever spent time in math class wondering “When are we ever going to use this?” this Learning Community can provide a great opportunity to experience how a real-life problem can motivate mathematical explorations rather than the typical experience of learning mathematical “tricks” and then searching for applications. Sound fun? We will participate in an out-of-class game tournament toward the end of the semester.

The Pursuit of Happiness

What makes us happy? Can happiness be bought and sold? Can it be learned or taught? Are some people just born to be happy, while others are not? In these Learning Communities, we will consider the many paths on the road to happiness as we examine aspects of our culture and our individual experiences that both contribute to and detract from our state of satisfaction and well-being.

LC 32- Religion in a Post 9/11 World

The lives of Americans were forever changed by the tragic events of 9/11. Our thinking about and even practice of religion has been transformed as a result of the unimaginable assault on U.S.soil. In this Learning Community, we will explore changes that have occurred and how those changes have affected the American people. We will address such topics as religion and violence and pluralism while developing our critical reasoning skills. Join us for this engaging dialogue about this historic event and its aftermath.

LC 33- Sex and Culture: How Culture Influences Sexuality

Sex is present everywhere in our daily life. It drives what we do, what we wear, what we watch, with whom we are going out. Yet, in the American society, it is still a very taboo topic not easily approached and often considered inappropriate. In this LC, we will be looking at how other cultures look at sexuality and how sex is perceived and taught at schools. Looking at other cultures will help us better understand what we do and how we treat each other.

First Gen Owls: Lifting Off into Higher Education

Are you a first-generation college student looking for an edge as you take flight on your college journey? In this Learning Community, students will have the opportunity to develop a strong foundation for achieving their higher education goals, and build a lasting network of fellow first-gen peers, professors, and mentors who can help them make the most of their time at KSU. Instructors will help students navigate the process of applying for grants and scholarships, and connect students with the undergraduate research, publication, and study abroad opportunities that make them more competitive candidates for internships, jobs, and/or grad school programs.

Thrive Program for HOPE Scholars

These Learning Communities for students in the Thrive Program help first-year HOPE Scholars transition successfully to the expectations of higher education while developing fundamental leadership skills. Thrive LC students attend academic workshops in the summer prior to matriculation and participate in team-building and community service activities. Graduation coaches help students navigate the new world of college with the goals of keeping HOPE and graduating in four years. For more information, contact the Thrive Program at 470-578-4437, or visit <http://uc.kennesaw.edu/thrive/index.php>

First-Year Global Fellows Study Abroad in Tuscany

Would you like to expand your horizons and study abroad during your very first semester of college? The Department of First-Year and Transition Studies and the Division of Global Affairs invite you to learn more about the Global Fellows fall 2017 study abroad program to Montepulciano, Italy. The Global Fellows program offers incoming first-year students the opportunity to spend the first seven weeks of the semester on campus, five weeks in Italy, then returning to campus prior to the Thanksgiving break to complete their first semester of studies at KSU. Students will maintain full-time schedules and complete at least 12 credit hours as part of the program. Students who wish to participate or are interested in the Global Fellows Program may request information online <http://dga.kennesaw.edu/ksuintuscany/globalfellows.php> or by emailing the Global Fellows Co-Directors, Drs. Linda Lyons and M. Todd Harper, at globalscholars@kennesaw.edu.

DISCIPLINE-SPECIFIC LEARNING COMMUNITIES – Marietta Campus

College of Architecture and Construction Management

Fundamentals of Design Thinking – for Architecture Majors

This Learning Community introduces theoretical and practical frameworks that inform architecture. Students shall develop practical foundational skills, including sketching, drawings, drafting, and model-making. Students shall also develop an awareness of the formal, philosophical, and ethical aspects in architectural design, including sustainable design and social issues. This allows students to understand how fundamental parameters in design, including formal, spatial, and phenomenal factors, influence decision-making and inform critical thinking. This LC will assign theoretical readings from architecture that will be paired with a series of drawing and problem-solving exercises, allowing students to develop and demonstrate skills in representation, reasoning, and problem-solving.

Mechatronics Engineering Learning Communities

If you are interested in the Mechatronics Engineering major, we invite you to enroll in these Learning Communities. You will build a strong foundation for college success in a small community of approximately 20 other first-year students with similar interests. We will interweave content from two required courses so you can apply what you are learning in both classes through a robotic design project.

College of Computing and Software Engineering

Computer Game Design and Development Majors

Like to play games? Ever dabble in mods or wish a game played differently? If so, this Learning Community is for you. Take the first two courses as a CGDD major or get elective credit for game design while completing your first required programming course as a computing major. Have fun discussing classic games and designing non-digital (board) games. Learn programming skills and build a digital game! We use cutting edge technologies, and you can participate in optional game development weekends with others that share your game dev passion!

College of Science and Mathematics

Success in Science and Mathematics

This Learning Community helps science and math majors build connections with other students and across the disciplines. Students will learn about the unique challenges facing students in degrees across the College of Science and Mathematics and how to tackle them while building a support network and beginning their studies for all of the CSM disciplines. The courses in this community will focus on integrating the many facets of success in science and math disciplines while giving students an important understanding of quantitative literacy and starting them on the path of discovery in the material universe.
