Learning Communities Spring 2017

Kennesaw Campus

General-Interest Learning Communities

The Pursuit of Happiness
What makes “happy” happen? Can it be learned or taught? Are some people just born to be happy? In this learning community, we will consider research-based ways to increase our levels of happiness, while also making friends and developing strategies for being successful in college. This learning community is open to first-year students who will have credit for ENGL 1101 by spring semester.
